

Same molecule
must NOT separate

response relative to a
different molecule

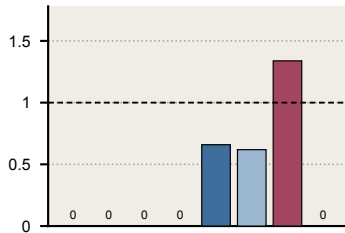

a

**Re-written
SMILES**

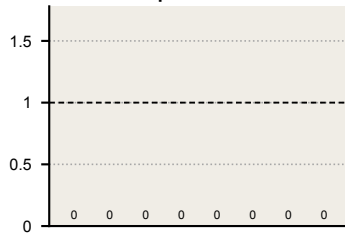

b

**Kekulé
form**

c

**Equivalent
positions**

ECFP4+stereo

ECFP4+desc

Morgan r3-counts

Morgan r3-counts+desc

CLIMB unsup, enum-augmented

CLIMB unsup, canonical

CLIMB sup

CheMeleon

--- = a different molecule (matched MW)

Input: SMILES as the pipeline writes them. Canonicalising first drives every cell in this figure to exactly 0.000.
